

LENS REFERENCES

/ B-CLEAR TECHNOLOGY

USAGE	LENS	DESCRIPTION	CONTRAST	LIGHT TRANSMISSION	BLUE LIGHT BLOCKED	FILTER CATEGORY	WEATHER
MODULATOR™ LENSES : PHOTOCROMIC TECHNOLOGY							
	Cycling Running Modulator Clear Grey	Darkening from clear (low light) to grey (bright light) ideal for unpredictable conditions	Neutral	76% - 20%	28%	1-2	
	Cycling Running Modulator Amber	Ranging from light amber to dark brown, contrast is enhanced in changing conditions	Enhanced	60% - 20%	62%	1-2	
	Golf Modulator V3 Golf	Constantly adapting to the course's environment, so contrast and subtleties are always optimized. Silver flash mirror reduces glare	Enhanced	32% - 14%	87%	2-3	
	Cycling Running Alpine Modulator Rose Gun	Enhanced contrast in both the light rose and dark rose state. A silver flash mirror reflects glare	Enhanced	38% - 10%	75%	2-3	
	Cycling Running Modulator Brown Emerald	Cycling/Alpine High-contrast brown photochromic lenses. The multilayer blue-green mirror reduces dazzle in high luminosity conditions.	Enhanced	27-10%	83%	2-3	
POLARIZED LENSES							
	Cycling Running Ski Polarized TNS	Neutral grey lens for bright conditions	Neutral	10%	93%	3	
NON-POLARIZED LENSES							
	Cycling Running Rose Gold	Grey/green lens with rose gold flash mirror for bright conditions	Neutral	13%	89%	3	
	Cycling Running Ski Rose Blue	Rose lens increases contrast in medium and bright light conditions. A blue flash mirror reflects glare on the brightest days	Enhanced	17%	90%	3	
	Cycling Running Alpine TNS	Neutral grey lens for bright conditions	Neutral	10%	88%	3	
	Cycling Running Alpine TNS Fire	Neutral grey lens with multi-layer red mirror reflects glare in bright conditions	Neutral	10%	88%	3	
	Extreme Low Light Clear	For the darkest conditions, to protect eyes from wind and debris while allowing maximum light transmission	Neutral	90%	19%	0	
	Cycling Running Alpine Lemon	Yellow lens reduces blue light that can blur definition, keeping vision clear without compromising optics in low light environments	Enhanced	76%	80%	1	
	Cycling Running Blue Violet	Neutral grey lens with a blue violet mirror for bright conditions	Neutral	10%	94%	3	
	Cycling Running Alpine Brown Emerald	Cycling/Alpine High-contrast brown photochromic lenses. The multilayer blue-green mirror reduces dazzle in high luminosity conditions.	Enhanced	11%	95%	3	
	Cycling Running Alpine TNS GUN	Neutral grey lens with silver mirror for bright conditions	Neutral	10%	88%	3	

/ B-20.3 POLYCARBONATE LENSES

USAGE	LENS	DESCRIPTION	CONTRAST	LIGHT TRANSMISSION	BLUE LIGHT BLOCKED	FILTER CATEGORY	WEATHER
MODULATOR™ LENSES : PHOTOCROMIC TECHNOLOGY AND POLARIZED							
	All-Purpose Modulator™ Polarized Grey	Light to dark Grey photochromic lens. The polarizing filter reduces glare and enhances contrasts.	Enhanced	28% - 11%	77% (Light state)	2 - 3	
MODULATOR™ LENSES : PHOTOCROMIC TECHNOLOGY							
	All-Purpose Modulator™ Grey	Darkening from clear (low light) to grey (bright light)	Neutral	20% - 7%	85% (Light state)	2 - 4	
	All-Purpose Modulator™ Rose	Enhanced contrast in both the light rose and dark grey state	Enhanced	35% - 12%	75% (Light state)	2 - 3	
POLARIZED LENSES							
	All-Purpose Polarized Blue Violet	Grey polarizing lens with purple/blue flash mirror	Neutral	14 %	95%	3	
	All-Purpose Polarized Rose Gold	Grey/green polarizing lens with rose gold flash mirror.	Neutral	16 %	87%	3	
	All-Purpose Polarized GB-10	Grey lens with metallic blue mirror	Neutral	10%	91%	3	
	All-Purpose Polarized TNS	Grey lens	Neutral	10%	93%	3	
	All-Purpose Polarized A-14	Amber lens	Enhanced	14%	94%	3	
	All-Purpose Polarized TNS Gun	Grey lens with silver mirror	Neutral	14%	88%	3	
	All-Purpose Polarized Axis®	Green lens	Neutral	16%	86%	3	
	All-Purpose Polarized TNS Fire	Grey lens with red mirror	Neutral	17%	87%	3	
	Marine Polarized Offshore Blue	Grey lens with blue mirror fights glare in bright marine conditions	Neutral	10%	91%	3	
	Marine Polarized Inland Gold	Amber lens with gold mirror fights glare in medium-light marine conditions	Enhanced	14%	94%	3	
	All-Purpose Polarized Sandstone Gun	Amber lenses with high contrast	Enhanced	16%	93%	3	
	Marine Polarized Brown Emerald	Amber lens with gold mirror fights glare in medium-light marine conditions	Enhanced	14%	94%	3	
NON-POLARIZED LENSES							
	All-Purpose Blue Violet	Grey lens with purple/blue flash mirror	Neutral	10%	92%	3	
	All-Purpose Rose Gold	Grey/green lens with rose gold flash mirror for bright conditions	Neutral	10%	90%	3	
	All-Purpose TNS	Grey lens	Neutral	10%	90%	3	
	All-Purpose TNS Gun	Grey lens with silver mirror	Neutral	13%	90%	3	
	All-Purpose TLB Dark	Brown lens	Enhanced	14%	93%	3	
	All-Purpose TNS Fire	Grey lens with red mirror	Neutral	17%	87%	3	
	Ski Bollé® 100 Gun	Dark amber lens with silver mirror protects in high altitude alpine environments NOT SUITABLE FOR DRIVING	Enhanced	5%	99%	4	
	Ski Bollé® 100 Dark	Dark amber lens protects in high altitude alpine environments NOT SUITABLE FOR DRIVING	Enhanced	5%	99%	4
